# BESPOKE ON-VEHICLE POWER SYSTEMS

Harnessing the power of your vehicle's engine to provide compact, efficient, reliable and safe sources of compressed air, electric and hydraulic power.

## System Overview

- ◆ Patented drive line power take off (DLPTO)
- ◆ System engagement controlled from the vehicle cab and/or load area
- ◆ Fit compressors up to 160cfm and/or power up to 60kVA
- ◆ Mattei rotary vane compressors
- ◆ Integrated engine RPM control
- ◆ Key out ignition run lock facility
- ◆ Dash mounted LED's to indicate PTO engagement
- ◆ Dashboard LED and system shutdown for high compressor temperature.

## Options

- ◆ Supply and fit LED roof beacons
- ◆ Supply and fit LED Work lights
- ◆ Inverters 250w – 4000w
- ◆ Supply and fit towing steps and safety steps
- ◆ Supply and fit client specific racking and workbench options
- ◆ Just ask and see if we can help

## Typical Applications

- ◆ Concrete pumping
- ◆ Water jetting
- ◆ Council support vehicles
- ◆ Water pumping with foam suppression (Cobra)
- ◆ Compressed Air Foam (CAF) systems
- ◆ Airport support vehicles
- ◆ Mobile workshops
- ◆ Special fire tenders
- ◆ Core and Vac technology
- ◆ Hydraulic drive systems
- ◆ Other emergency service vehicles

## KEY BENEFITS FOR YOU

- ✓ Complete control over specification, full system design capability.
- ✓ Can be supplied with 110v/240v power at up to 60kVA to power lights, tools, welfare equipment and site equipment/plant.
- ✓ Power integrated into the vehicle.
- ✓ No need to carry a separate fuel supply.
